## SUGGESTIONS

Here is a list of the publications of the Bureau of Agricultural Economics that are available now. We have added a list of charts published or revised during the last 3½ years.

If you'll take a minute to read this note, you can help yourself get the facts and figures you want, and you can avoid the time and expense of asking for publications that you may not want or need.

Some folks ask us to put them on the mailing list for "everything" BAE publishes, just to make sure they get the few reports they really want. But some of our reports are useful only to persons interested in honey and beeswax and some of them only to persons interested in truck crops. Very few people really need all of them. So this is what we suggest:

If you want some of the "one time only" research reports, ask us to send you our monthly Checklist of BAE Publications (it also lists all the maps and charts released during the month,) and then write for the report you want.

If you want certain statistics regularly just as soon as they are released, find out which report publishes the figures first. For instance, detailed figures on prices received by farmers are published first in "Agricultural Prices" which is mimeographed each month. They are summarized a few weeks later in the Agricultural Situation and the different commodity situation reports. Among the reports that make the first release of figures are the crop and livestock reports listed on pages 16 to 22, The National Food Situation, The Farm Income Situation, The Marketing and Transportation Situation, and Current Developments in the Farm Real Estate Market.

If you are interested in an analysis of supply, demand and price outlook you will want either The Agricultural Outlook Digest (a very brief summary) or The Demand and Price Situation (which gives more detail for the general economic situation and individual commodities) or one of the individual reports such as The Livestock and Meat Situation.

If you want county figures, you'll have to get them from the Census of Agriculture taken every 5 years by the Bureau of the Census (U. S. Department of Commerce) or else write to the Agricultural Statistician of your State (listed on pages 4 to 5) to see if he has later estimates for the particular subject you want.

If you still are not sure which publication will serve you best, write to us, telling us what you want as specifically as possible. We want to help you, but please don't ask to be put on the mailing list for a monthly publication unless you have seen a sample copy and are sure you want it. And please do ask us to take your name off the mailing list whenever you no longer want a publication you are getting.

The reports listed in this publication are those available on June 1, 1952. The charts listed were issued between January 1, 1949 and June 1, 1952. The monthly checklist of BAE publications supplements these lists.

## THE BUREAU OF AGRICULTURAL ECONOMICS

### WORK OF THE BUREAU

The Bureau of Agricultural Economics is the primary agency in the Department of Agriculture for the collection and dissemination of agricultural statistics, for economic research, and for the dissemination of the results thereof. As a staff agency of the Secretary, it also coordinates the statistical work and economic research of the Department.

The Bureau acquires, analyzes, interprets, and diffuses economic information relating to agricultural production and distribution, land utilization and conservation in their broadest aspects, including farm management and practice, utilization of farm and food products, purchasing of farm supplies, farm population and rural life, consumer preferences in regard to foods and fabrics, farm labor, farm finance, insurance and taxation, adjustments in production to probable demand for the different farm and food products, land ownership and values, and costs, prices, and income in relation to agriculture, including causes for their variations and trends.

The Bureau also collects, compiles, abstracts, analyzes, summarizes, interprets, and publishes economic and statistical data relating to agriculture and food. These data include crop and livestock estimates, stocks and value of farm crops; and numbers, classes, and value of livestock and livestock products on farms. Finally, the Bureau helps to formulate programs for the authorized activities of the Department. Each month the Bureau determines and publishes parity or comparable prices for agricultural commodities.

The Bureau conducts and cooperates in conducting research on a variety of projects authorized under the Research and Marketing Act. Results are published either by the Bureau or by cooperating agencies.

The Bureau also employs agricultural statisticians, most of them in cooperation with State agencies, to prepare and release State agricultural estimates. These are listed on page 4. Most of the research staff conducting economic investigations in the States are stationed at the State agricultural colleges. These workers are listed on page 6.

## OFFICE OF THE CHIEF

Oris V. Wells, Chief

Foster F. Elliott, Associate Chief

Bushrod W. Allin,  
Chairman Outlook and Situation Board

Earl E. Houseman,  
Statistical Assistant

Wm. T. Wolfrey, Jr.  
Assistant to the Chief,  
Administrative Management

Herman M. Southworth,  
Research Assistant

Franklin Thackrey,  
Director of Economic Information

## DIVISIONS OF WORK

Assistant Chief for Agricultural Estimates (and Chairman, Crop Reporting Board)  
Sterling R. Newell

Agricultural Price Statistics, B. Ralph Stauber, Head  
Dairy Statistics, Benjamin H. Bennett, Head  
Field Crop Statistics, Charles E. Burkhead, Head  
Fruit and Vegetable Statistics, Reginald Royson, Head  
Livestock and Poultry Statistics, Arnold V. Nordquist, Head  
Special Farm Statistics, Emerson M. Brooks, Head

Assistant Chief for Farm Population  
Raymond C. Smith

Farm Population and Rural Life, Carl C. Taylor, Head  
Special Surveys, Forrest E. Clements, Head

Assistant Chief for Prices and Marketing  
Frederick V. Waugh

Marketing and Transportation Research, Bennett S. White, Jr., Head  
Statistical and Historical Research, Karl A. Fox, Head

Assistant Chief for Production Economics  
Sherman E. Johnson

Agricultural Finance, Norman J. Wall, Head  
Farm Management and Costs, Carl P. Heisig, Head  
Land Economics, Ernst H. Wiecking, Head

----------	----------------------	---	---------	--------

1/ P. O. Box should be used invariably in addressing letters and similar mail, except for special delivery mail and the larger pieces, packages or sacks requiring delivery direct to office. Use first zone number shown, if any, for P. O. Box mail. Use bracketed zone number, where shown, for mail sent to street or building address (which is usually received much later than box mail). In any event, use only P. O. Box or office address, never both. For telegrams, use office address, not P. O. Box. 2/ List as of June 6, 1952. 3/ For Delaware also. 4/ For Nevada also.

## PERIODICALS AND SCHEDULED REPORTS

### SITUATION REPORTS

The Agriculture Situation is a printed monthly periodical. It contains brief reviews of current economic developments affecting farmers. Short articles analyze the situation as to marketing, food supplies, price conditions, scientific developments that affect agriculture, farm land values, farm-mortgage debt, etc. Outlook highlights are included, and one issue each year is devoted to the outlook for the succeeding year. The periodical is designed primarily for volunteer crop and price reporters and for county agents and other local agricultural workers.

Free distribution of this periodical is limited chiefly to workers in the categories listed above and to libraries, the press, and Government officials. It may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for 50 cents a year (foreign rate 70 cents). Make checks payable to "Superintendent of Documents."

The Demand and Price Situation, issued monthly, reviews the factors that affect the demand for farm products—output and employment, income and related factors, commodity prices, and agricultural exports. This is followed by a brief review of farm income and discussion of general trends in demand, supply, and prices of the more important farm products. A table, Economic Factors Affecting Agriculture, shows index numbers of these and related factors. Provides more detailed and technical analyses than does "The Agricultural Situation." An annual Outlook issue appears each fall.

The Farm Income Situation, issued bimonthly, presents estimates of cash receipts from farm marketings by commodity groups and Government payments, for the two preceding months, with cumulative totals through the preceding month; index numbers of cash receipts and of physical volume of farm marketings for several preceding months; and for crops and livestock, estimates, by States, of cash receipts from sales. From time to time annual estimates are included which show Government payments to farmers, by States; value of home consumption, by States, for crops and livestock; gross and net income of farm operators; cash receipts and home consumption by detailed commodities; and cash receipts from farm marketings, by States, by major individual commodities. Each fall an issue is devoted to the outlook for farm income for the succeeding year.

The Marketing and Transportation Situation, issued quarterly, contains statistical tables showing price spreads between the farmer and the consumer for foods and other farm products and related information as to marketing charges, consumer expenditures for food products, and the share of the consumer's dollar that is received by farmers. Summaries of recent developments in the field of marketing and transportation of farm products are included in each issue. Emphasis is placed on reporting results of marketing research conducted in the Bureau. Each fall the outlook for marketing and transportation of farm products is analyzed.

The National Food Situation, issued quarterly, contains statistical tables showing per capita consumption of major foods, nutrients available for civilian consumption, production of major food commodities, and retail food prices and total consumer price index numbers. A nutritional review and reviews of supply, production, marketing, retail prices, and consumption of major foods are included.

The Farm Cost Situation, issued twice yearly, reviews the situation as to farm labor, farm power and machinery, feeds, livestock on feed or to be fed, seeds, fertilizer, lumber and building materials, containers and supplies, insecticides and fungicides, land values and rentals, interest, taxes, and insurance, and costs on farms of different types. Tables showing index numbers are included for goods and services used in production; prices and wage rates paid by farmers, United States; farm wage rates and related data; farm power and machinery; feed supplies in relation to livestock; retail seed prices; farm real estate; and in some issues, net income and total production and operating expense per dollar of gross farm income, family-operated farms, by type.

The following commodity situation reports give a fairly complete picture of the supply, demand, price, and outlook for each of the more important farm products for which adequate information is available. They contain information on the outlook for agricultural commodities to aid in planning production and marketing. Tables and charts present current figures on acreage, yield, production, market movement, stocks, consumption, and prices, with comparisons with other significant periods. From time to time the results of special studies relating to prices of the respective commodities are included.

The Cotton Situation, 6 times a year.

The Dairy Situation, 6 times a year.

The Fats and Oils Situation, 6 times a year.

The Feed Situation, 6 times a year.

The Fruit Situation, 4 times a year.

The Jute and Hard Fibers Situation, annually.

The Livestock and Meat Situation, 6 times a year.

The Poultry and Egg Situation, 6 times a year.

The Tobacco Situation, 4 times a year.

The Vegetable Situation, 4 times a year.

The Wheat Situation, 6 times a year.

The Wool Situation, 4 times a year.

The World Sugar Situation, annually.

#### OUTLOOK INFORMATION

The Agricultural Outlook Digest appears monthly. As its name implies, it is a brief digest of current indications as to the outlook for production, farm employment, demand, exports, prices received by farmers, prices paid by farmers, and the outlook for various farm commodities. For the most part, it summarizes the Demand and Price Situation in two pages.

Agricultural Outlook Charts, issued each fall, contains charts and maps, with accompanying data that are likely to be especially useful to Extension workers and others in presenting the key factors in the economic situation and outlook for agriculture. These include highlights of the Nation's general economic situation, as well as extensive information on food supplies and consumption, farm production, prices, income, expenditures, land and land values, and farmers' share of the consumer's food dollar. Numerous commodity charts show the important trends for individual crops, livestock, and livestock products.

A 35 mm. color film strip is available, containing the charts shown in 1952 Agricultural Outlook Charts. By cutting and mounting segments of this strip, you can easily make 2" x 2" slides of any of the individual charts and maps. Copies of the 1952 outlook film strip can be purchased at \$5.25 for each full strip, or the 80 color charts can be obtained in the form of 2" x 2" cardboard-mounted slides for a total of \$9.25. Order and remittance should be sent to:

Photo-Lab, Inc.,  
3825 Georgia Ave., N. W.,  
Washington 11, D. C.

Photographic prints, dull or glossy, of separate charts and maps are for sale at 55 cents each for 8" x 10" prints. Ozalid prints of outlook charts, 30" x 40" in size, can be supplied for \$1.06 each. Single bromide enlargements, 30" x 40" in size, of charts and maps other than outlook charts, will be made for \$9.55 each. See page 83 for information on ordering and paying for charts.

The situation reports listed above carry current outlook materials and an annual statement—published at the time of year when the farmer can make use of such data in preparing his production and marketing plans for the coming year. One complete issue of each situation report is devoted to this subject. Other materials, including some of the addresses made at the most recent Outlook Conference, are listed on page 40.

## CHECKLIST

The Checklist of publications, a monthly supplement to Agricultural Economic and Statistical Publications, lists Bureau publications, including charts and maps, issued during the previous month. This list will prove helpful to those who wish to keep up to date on all material issued on a specific subject.

## STATISTICAL SUMMARY

The Statistical Summary, prepared for ready-reference desk use, is a two-page monthly round-up of current information on farm income, prices paid and received by farmers, farm employment, marketing margins, production, stocks, and indications for principal crops and livestock and livestock products. It contains tables showing current index numbers for agriculture and parity prices for farm products compared with actual prices received.

## AGRICULTURAL ECONOMICS RESEARCH

Agricultural Economics Research, issued quarterly, began with the January 1949 issue. It is intended as a medium for the publication of technical articles which deal with methods, results, and findings of research in agricultural economics. Included are interim reports on work in progress, articles on new research methods or techniques, critical discussions of old techniques that are in regular use, and articles on new or expanding areas of research or statistical fact-gathering. Discussions of techniques cover the probable usefulness of new developments and the place of such new areas of work in the agricultural field. Invited to contribute to the journal are Bureau representatives, State statisticians, and members of their staffs. Each issue carries a list of recent research and statistical publications in agricultural economics issued by the Bureau and cooperating State Agencies.

Free distribution of this periodical is limited chiefly to professional workers. It may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for 75 cents a year (foreign rate \$1.00). Single copies are 20 cents each. Make checks payable to "Superintendent of Documents."

## AGRICULTURAL FINANCE

The Agricultural Finance Review, issued annually at the end of the calendar year with an annual supplement issued in midyear, discusses current developments and research findings in the various phases of agricultural finance. In addition, it is a basic source of financial data pertaining to agriculture in the United States. As such, it is intended for use by agricultural groups, government officials, economists, and educators who have need for a ready compilation of material relating to agricultural finance.

Signed articles by research specialists or officials of operating agencies and brief news items cover important developments in the changing financial situation of agriculture and in the financial institutions that serve agriculture. Research findings and analyses relate to such subjects as sources of capital used in agriculture, farm-mortgage credit, non-real-estate credit, financing of specialized activities such as purchase of machinery, and storage of commodities; agricultural risk and insurance, farm bankruptcies, farm real estate volume and transfers, taxation of farms and of farmers, and the interrelations of agriculture and public finance.

A statistical appendix contains detailed data by States and by geographic divisions.

The Review carries a list of current research activities in agricultural finance as reported by Federal and State agencies. Reviews of pertinent books are included.

Those who are interested in further background information concerning agricultural finance should consult Miscellaneous Publication 567, Impact of the War on the Financial Structure of Agriculture; Miscellaneous Publications 583, 620, 642, and 672, and Agricultural Information Bulletins 1, 26, and 73, The Balance Sheet of Agriculture for the years 1945, 1946, 1947, 1948, 1949, 1950 and 1951. For reports that contain detailed treatment of certain specific phases of agricultural finance, see Technical Bulletin 777, Country Banking in Wisconsin During the Depression; Miscellaneous Publication 478, Farm-Mortgage Credit Facilities in the United States; Miscellaneous Publication 621, Life Insurance for Farm Families, and Miscellaneous Publication 652, Managing Farm Finances. Copies of reports that are not available here may be consulted in libraries. If available, they are listed, along with other reports on agricultural finance, on pages 26 to 27.

## AGRICULTURAL INCOME

The Farm Income Situation and other situation reports, for the most part, carry only current information and statistics relating to farm income. For historical series relating to cash and gross income from major crops and livestock products, net income from farming, and per capita income, both farm and nonfarm, see Agricultural Statistics, a printed annual publication of the Department to which the Bureau contributes.

## AGRICULTURAL PRICES

Agricultural Prices, issued monthly, contains tables showing prices received by farmers for principal crops, livestock, and livestock products; prices paid by farmers for commodities bought; index numbers of prices received by farmers; indexes of prices paid by farmers for articles bought; and parity prices for farm products with current average price as a percentage of the current parity price.

For the most part, Agricultural Prices, The Agricultural Situation, The Demand and Price Situation, and other situation reports contain only current information and statistics relating to agricultural prices. For historical statistical series see Agricultural Statistics, which contains series showing average prices of farm products, manufactured dairy products, textiles, oils, fungicides and insecticides, oleomargarine, gum naval stores, seeds, rosin, turpentine, etc, at specified markets; prices received by farmers and parity prices; index numbers of prices received by farmers; the farm-to-retail spread; prices paid by farmers; indexes of prices paid by farmers; and index numbers of wholesale prices. Crops and Markets contains supplementary series showing prices received by farmers, by months, by States, and for the United States; prices paid by farmers, by States and by selected months; price indexes; and market prices for grain on a cash basis. Separate reports to be consulted include Fruit and Nut Prices; Prices received by Growers for Fruit and Nut Crops by Type of Sale and Utilization Groups, 1909-46, with Supplements bringing this publication to date issued in connection with Agricultural Prices in July, August, September, and October; Farm Production, Farm Disposition, and Value releases for individual commodities for varying periods of time beginning with 1909. These reports are brought to date in Farm Production, Farm Disposition and Value of Principal Crops published in May of each year for crops, and in similar disposition reports for dairy, poultry, and livestock items published in March and April each year.

The scope of the data relating to prices received and prices paid collected by the Department, the general procedures followed in preparing estimates of prices, the methods of collection of price data, and the use of the data in connection with price-support programs are discussed in Chapter 15 of The Agricultural Estimating and Reporting Services of the United States Department of Agriculture, issued in December 1949 as Miscellaneous Publication No. 703.

## CONSUMER PURCHASES OF SELECTED FRUITS AND PRODUCTS

Consumer Purchases of Selected Fresh Fruits, Canned and Frozen Juices, and Dried Fruits, issued monthly, presents data on volume of household consumer purchases, percentage of families buying, average size of purchases, and average prices paid, on a national basis. These data are published quarterly after being analyzed by region of the country in which the purchases were made and by type of retail outlet. The quarterly reports are entitled Consumer Fruit and Juice Purchases. Annually, an analysis of these data is published by size of city in which the purchaser lives and by family characteristics. The title of the annual summary is Consumer Buying Practices for Selected Fresh Fruits, Canned and Frozen Juices, and Dried Fruits, Related to Family Characteristics, Region, and City Size. The products covered in these reports include fresh citrus fruits, frozen and concentrated fruit and vegetable juices, frozen and shelf pack ades and bases, and selected dried fruits.

## CROPS AND MARKETS

Crops and Markets, formerly issued quarterly, is now a printed annual publication designed chiefly to supplement Agricultural Statistics with detailed statistics by time periods and States. Data include estimates of important crops; historical and summary tables on crops; stocks of various grains; production of eggs and milk; livestock slaughter statistics; number of livestock on farms, by classes; prices received by farmers, by States and by months, with an historical series for the United States; prices paid by farmers, by States and selected months, and historical series for the United States; price indexes; market prices for grain on a cash basis; price spreads; farm employment and wages.

Distribution of this periodical is limited chiefly to workers in agricultural colleges and experiment stations and other institutions, and to those individuals who assist the Department of Agriculture in collecting or disseminating information. Libraries, the press, and Government officials may also receive it.

## FARM LABOR AND EMPLOYMENT

Farm Labor, issued monthly, contains each month a table showing persons employed, wage rates, and indexes of employment, wage rates and related data, with comparisons with previous months for the United States. Numbers of persons employed on farms—total, family and hired workers—for the United States and geographic divisions, with historic comparisons appear monthly. Length of farm work-day for operators and for hired workers appears in the June, September, and December issues. Farm wage rates are given quarterly, beginning with the January issue, by nine different categories of rates for selected States and geographic regions. Cotton picking rates appear in November.

Except for comparable data for the preceding month, quarter, and year, Farm Labor usually contains only current estimates. Those who wish statistical data for earlier years of the type contained in Farm Labor should consult Agricultural Statistics and Crops and Markets. Reports of wage surveys made in various parts of the country, wage analyses, and miscellaneous reports relating to farm employment and wages may be found on pp. 32 to 34.

Each year a special survey is made on the hired farm working force and a report is published on the total number of persons who work on farms for wages in the course of a year. Special attention was given to identification of migratory workers, their employment and wages in one of the reports issued in this series during 1950.

## FARM POPULATION ESTIMATES

Farm Population Estimates, usually issued annually, contains current estimates of the distribution of the farm population by major geographic divisions and estimates of the components of annual change (births, deaths, and migrants) in the farm population, both for the United States and for the geographic divisions. From time to time, special reports are issued in this series that contain an historical array of estimates of this type for the years from 1910 on, or which contain estimates for States for intercensal dates. The complete titles of the reports are indicative of the contents.

The Census-BAE Series, prepared cooperatively with the Bureau of the Census, provides estimates of the distribution of the farm population by age, sex, and labor force status. Certain reports in this series contain information on related subjects such as farm dwellings and households, farm operators, etc. Census-BAE Series and Farm Population Estimates contain the same estimate of the total farm population of the United States for a given date but the distributions shown in each were obtained independently. A recent issue of the Census-BAE Series included a delineation of state economic areas that are being used in tabulations of the 1950 Censuses of Population and Agriculture. Selected figures from these two series of reports are published in Agricultural Statistics. A list of the reports that are available now is given on pages 32 to 34.

## THE FARM REAL ESTATE SITUATION

Current Developments in the Farm Real Estate Market, issued three times a year (April, Aug., and Dec.), summarizes significant facts on trends in land values, volume of sales, financing farm purchases, and influences in the land market. Index numbers of estimated value per acre, by States, are included in each issue. Graphic material is included occasionally.

The Farm Real Estate Situation, issued periodically as one of the circular series of the Department, reviews briefly the situation in general and summarizes significant facts on trends in farm land values, sales, and credit; farm income, land earnings and values; and other influences in the farm real estate market.

For tables showing taxes and values of farm real estate over a period of years as well as other pertinent information see Agricultural Statistics. For reports on the land market in selected areas see those listed on pp. 34 to 36 of this publication.

## MARKETING MARGINS FOR FLORIDA ORANGES

Marketing margins for Florida Oranges in 10 Major Cities, issued monthly, presents data on marketing margins for fresh oranges, canned single strength orange juice, and frozen concentrated orange juice from Florida.

## NAVAL STORES

Production and Stocks of Naval Stores, issued monthly, contains data showing production of naval stores at central gum stills and wood plants and stocks of turpentine, rosin and miscellaneous naval stores, which include pine oil, dipentene, other monocyclic hydrocarbons, and pine tar. The monthly average price paid for crude gum delivered at central stills and the mid-month parity price are also given.

Naval Stores Report, issued quarterly, gives data showing turpentine and rosin production, consumption, and stocks by positions; production and stocks of miscellaneous naval stores; and production of gum turpentine by States. Reports for the second, third, and fourth quarters show the production and consumption to date for the year. The report for the fourth quarter, called Annual Naval Stores Report, shows the number of turpentine cups sold, value of gum naval stores production, and the season average price paid for crude gum delivered at central gum stills.

These are current figures. For earlier series see Agricultural Statistics. Consult the index under Naval Stores, Rosin, and Turpentine. Prices for crop years are included.

## CROP AND LIVESTOCK PRODUCTION REPORTS

The agricultural estimating service of the Bureau of Agricultural Economics 1/ includes an extensive program of periodic reports on crop production and related information. These reports, unless otherwise specified, are issued by the Washington office for the country as a whole. They are reissued, through the 41 field offices (See pp. 4 and 5), with emphasis on local conditions.

The reports are given general distribution by press and radio. Immediately after release, mimeographed copies are available for distribution to those who request them for use in official work.

A detailed schedule of release dates 2/ for the various crops and livestock reports to be issued by the Crop Reporting Board during 1952 follows:

### Reports on Cotton

(Released at 11:00 a.m. e.s.t.)

- |              |   |
|--------------|---|
| May 8:       | Acreage, yield per acre, production of cotton lint and seed, value of production of lint, disposition and value of cottonseed, monthly marketings by farmers, reduction from full yield per acre due to boll weevil and other causes (1951 crop). |
| July 8:      | Acreage of cotton in cultivation on July 1.   |
| August 8:    | Condition as of August 1, indicated yield per acre, indicated production, commercial fertilizer used on cotton, sales of fertilizer for all purposes in cotton States.  |
| September 8: | Condition as of September 1, indicated yield per acre, indicated production, percentage of acreage abandoned since July 1, acreage for harvest.   |
| October 8:   | Condition as of October 1, indicated yield per acre, indicated production.  |
| November 10: | Yield per acre as of November 1, probable production.   |
| December 8:  | Yield per acre as of December 1, probable production, acreage for harvest, acreage in cultivation July 1, production of cottonseed.   |

1/ For a complete description see "The Agricultural Estimating and Reporting Service of the United States Department of Agriculture". Misc. Pub. 703.

2/ Whenever dates given conflict with Saturdays, Sundays, or holidays, the scheduled report is released on the next business day. A new Schedule is issued in January of each year and is available free upon request.

General Reports on Production

(Released at 3:00 p.m. e.s.t.)

- January 10: Stocks of corn for grain, wheat, oats, barley, rye, soybeans, and hay on farms as of January 1; milk production; poultry and egg production; indicated production of citrus fruits (1951-52 crop).
- February 11: Milk production; grain fed per milk cow; poultry and egg production; indicated production of citrus fruits (1951-52 crop).
- March 10: Milk production; poultry and egg production; indicated production of citrus fruits (1951-52 crop).
- March 19: Prospective Plantings for 1952 as indicated by reported intentions for corn, durum wheat, other spring wheat, oats, barley, flaxseed, rice, all sorghums, potatoes, sweetpotatoes, tobacco, dry edible beans, dry field peas, soybeans, cowpeas, peanuts, and sugar beets; acreage of hay for harvest.
- April 10: Indicated production of winter wheat; indicated percentage abandonment of winter wheat seedings, U. S.; condition of rye and pasture; for certain States, condition of peaches and potatoes; stocks of corn for grain, wheat, oats, barley, rye, and soybeans on farms as of April 1; milk production; grain fed per milk cow; poultry and egg production; indicated production of citrus fruits (1951-52 crop), Florida limes (1952 crop).
- May 9: Acreage remaining for harvest as of May 1, yield per acre and indicated production of winter wheat and rye; percentage of abandonment of winter wheat seedings for U. S.; condition of hay, pasture, and miscellaneous fruits and nuts; stocks of hay on farms; for certain States, condition of oats, potatoes, peaches, pears, grapes, and cherries; indicated production of citrus fruits (1951-52 crop); peaches in 10 early Southern States, apricots, cherries, and plums in California and of Florida limes (1952 crop); preliminary production of maple products (1952 crop); milk production; poultry and egg production. Also for 1951 crop, acreage, yield per acre, production and value of production of tobacco (by types and classes).
- June 10: Indicated yield per acre as of June 1 of winter wheat and rye; indicated production of winter wheat, spring wheat, rye, peaches, pears, cherries, apricots, California plums, prunes, and walnuts, Florida limes (1952 crop), and citrus fruits (1951-52 crop), condition of hay, pasture, citrus fruits (1952-53 crop), California grapes, and miscellaneous fruits and nuts; condition of potatoes for certain States; milk production; grain fed per milk cow; poultry and egg production. Also for 1951 crops, acreage, yield per acre, production, and value of production of sugar beets, and sugarcane; and production of beet and cane sugar, sugar beet pulp, and products of cane ground for sugar.
- July 10: Stocks of corn for grain, wheat, oats, barley, rye, and soybeans on farms as of July 1; planted acreage of corn, winter wheat, spring wheat, oats, barley, flaxseed, rice, potatoes, sweetpotatoes, dry edible beans, dry field peas, all sorghums, sugar beets, mung beans, and popcorn; acreage for harvest, indicated yield per acre as of July 1, and indicated production of corn, winter wheat, spring wheat, oats, barley, rye, flaxseed, rice, hay, potatoes, sweetpotatoes, tobacco, sugar beets, sugarcane for sugar and seed, dry edible beans, dry field peas and hops; acreage grown alone for all purposes of soybeans; acreage for harvest of soybeans for beans, and all sorghums; indicated production of apples (commercial), peaches, pears, grapes, cherries, apricots, plums, prunes, almonds, filberts, and walnuts, Florida limes (1952 crop), and citrus fruits (1951-52 crop); condition of pasture; citrus fruits (1952-53 crop), and miscellaneous fruits; milk production; poultry and egg production. Revised estimates of the 1951 peanut crop.
- August 11: Indicated yield per acre as of August 1 and indicated production of corn, winter wheat, spring wheat, oats, barley, rye, flaxseed, rice, all sorghums for

grain, hay, dry edible beans, dry field peas, soybeans for beans, peanuts picked and threshed, potatoes, sweetpotatoes, tobacco, sugar beets, sugarcane for sugar and seed, broomcorn, and hops; acreage of all sorghums for grain, peanuts picked and threshed, and broomcorn, stocks of rice on farms as of August 1; indicated production of apples (commercial), peaches, pears, grapes, cherries, apricots, plums, prunes, almonds, walnuts, filberts, and pecans; condition of pasture, citrus fruits (1952-53 crop) and miscellaneous fruits; milk production, grain fed per milk cow; poultry and egg production.

September 10: Indicated yield per acre as of September 1 and indicated production of corn, spring wheat, oats, barley, flaxseed, rice, all sorghums for grain, hay, dry edible beans, dry field peas, soybeans for beans, peanuts picked and threshed, potatoes, sweetpotatoes, tobacco, sugar beets, sugarcane for sugar and seed, and hops; indicated production of apples (commercial), peaches, pears, grapes, plums, prunes, apricots, cranberries, almonds, walnuts, filberts, and pecans; condition of pasture, citrus fruits (1952-53 crop) and miscellaneous fruits; milk production; poultry and egg production.

October 10: Stocks of corn for grain, wheat, oats, barley, rye, and soybeans on farms as of October 1; indicated yield per acre and indicated production of corn, all wheat, spring wheat, oats, barley, flaxseed, rice, all sorghums for grain, hay, dry edible beans, soybeans for beans, peanuts picked and threshed, potatoes, sweetpotatoes, tobacco, sugar beets, sugarcane for sugar and seed, and hops; indicated production of apples (commercial), peaches, pears, grapes, plums, prunes, cranberries, citrus fruits (1952-53 crop), almonds, walnuts, filberts, and pecans; condition of pasture, citrus fruits (1952-53 crop), and miscellaneous fruits; milk production; grain fed per milk cow; poultry and egg production.

November 12: Indicated yield per acre as of November 1 and indicated production of corn, rice, all sorghums for grain, dry edible beans, soybeans for beans, peanuts picked and threshed, potatoes, sweetpotatoes, tobacco, sugar beets, sugarcane for sugar and seed, production of apples (commercial), pears, grapes, cranberries, citrus fruits (1952-53 crop), almonds, walnuts, filberts, and pecans; condition of pasture, citrus fruits (1952-53 crop), and olives; milk production; poultry and egg production.

December 10: Indicated production of citrus fruits; milk production; grain fed per milk cow; poultry and egg production.

December 17: Annual summary of acreage, yield per acre, production of all crops.

December 17: Season average prices and value of production of principal crops.

December 19: Seeded acreage and indicated production of winter wheat, and acreage and condition of rye for harvest in 1953.

#### Other Reports Concerning Crop Production

Wheat Stocks in Interior Mills, Elevators, and Warehouses, in Merchant Mills, and total Stocks in all positions on farms and off farms; Rye stocks in all positions; 3:00 p.m., January 25, April 25, July 25, and October 24.

Corn, Oats, Barley and Sorghum Grain 1/ Stocks in all positions: 3:00 p.m., January 25, April 25, July 25, and October 24.

Soybean and Flaxseed 1/ Stocks in all positions: 3:00 p.m., January 29, April 29, July 29, and October 29.

Peanut Stocks and Processing: Jan. 24, Feb. 25, Mar. 24, Apr. 24, May 23, June 24, July 24, Aug. 25, Sept. 24, Oct. 24, Nov. 24, Dec. 23.

Potato Stocks: 3:00 p.m., January 18 and March 14, 1/

---

1/ Reports resulting from special work undertaken under Research and Marketing Act Funds.

Onion Stocks (Jan. 1): 3:00 p.m., January 17.

Cabbage Stocks (Jan. 1): January 17.

Hop Stocks: March 24, 1/ and September 23, 1/.

Commercial Truck Crops for Fresh Market and Processing:

Fresh Market Crops: Acreage and indicated production of crops in areas of current importance. January 10; February 11; March 10; April 10; May 9; June 10; July 10; August 11; September 10; October 10; November 12; December 10 and 17.

Processing Crops: Acreage, production, and condition of crops in areas of current importance. January 10; March 10; April 10 and 22; May 9 and 21; June 10 and 20; July 10 and 22; August 11; September 10; October 10; November 12; December 17.

Apples: Production by varieties: August 14 and December 18.

Sour Cherries: Mid-June Production forecast (New York, Ohio, Pa., Mich., and Wis.) 3:00 p.m., June 20.

Fruits - Non-Citrus - Production and Utilization: July 2.  
Citrus - Production and Utilization: October 13.

Nut Crops - Production and Utilization - August 22.

Cranberries: Indicated production, 1:00 p.m., August 19.

Seed Crops:

Jan. 16	Acreage and Production of 50 kinds of vegetable seeds 1/	Aug. 19	Bentgrass and Fescue (Tall, Chewings, and Red.)
Apr. 18	Intended acreage and prospective production of 50 kinds of vegetable seeds 1/	Aug. 25	Alsike Clover
June 20	Crimson Clover	Aug. 25	Timothy
June 27	Lupine	Aug. 28	Ladino Clover
June 27	Winter Cover Crops	Aug. 28	White Clover (Wis., Idaho, Ky. and Tenn.)
July 8	Kentucky Bluegrass	Sept. 2	Winter Cover Crops (Vetches, etc.)
July 14	Orchardgrass	Sept. 5	Mustard Seed
July 25	Redtop (Illinois)	Sept. 15	Sweetclover
Aug. 7	Stocks of 34 kinds of field seeds held by dealers on June 30.	Sept. 16	Bromegrass & Wheatgrasses
Aug. 18	Stocks of 50 kinds of vegetable seeds held by dealers on June 30 1/	Oct. 3	Red Clover
		Oct. 14	Alfalfa
		Oct. 17	Sudangrass
		Nov. 21	Lespedeza
		Dec. 19	Miscellaneous Seed Crops
		Dec. 31	Certified Seed Potatoes

Additional seed reports will be issued at appropriate intervals on prices, movement, quality, stocks and disposition of important field seeds.

Farm Disposition and Sales of Crops:

Fruit and Nut Crops: January 14.

Principal Field and Seed Crops (except cotton, tobacco, and sugar) May 5

Cotton and Cottonseed: Cotton report May 8.

Tobacco: With General Crop report May 9.

Sugar Beets and Sugar Cane: With General Crop report, June 10. ✓

Percentage of Corn Acreage Planted with Hybrid Seed: On or about July 11.

1/ Reports resulting from special work undertaken under Research and Marketing Act Funds.

### Reports on Livestock

\*(Released at Washington, D. C., at 12:00 o'clock Noon e.s.t.)

January 10: Sheep and Lambs on Feed for Market on January 1.  
January 17: Cattle on Feed for Market on January 1.  
January 17: Cattle on Feed — Illinois, Iowa, Nebraska — January 1 1/  
\*February 14: Number and Value of Livestock, including poultry, on farms on January 1, 1952  
February 27: Wool Production and Income, 1951.  
February 28: Mohair Production and Income, 1951.  
March 10: Early Lamb Crop as of March 1 (10 States)  
April 10: Development of Early Lamb Crop, as of April 1.  
April 17: Cattle on Feed for Market, Corn Belt States, as of April 1.  
April 17: Cattle on Feed — Illinois, Iowa, Nebraska — April 1 1/  
April 29: Farm Production and Income from Meat Animals, 1951.  
May 12: Development of Early Lamb Crop, as of May 1.  
\*June 19: Spring Pig Crop, and Fall Farrowings indicated by Breeding Intentions as of June 1.  
July 17: Cattle on Feed for Market, Corn Belt States, as of July 1.  
July 17: Cattle on Feed — Illinois, Iowa, Nebraska — July 1 1/  
July 30: U. S. Lamb Crop. 1952. Number and Percentage of Breeding Ewes.  
August 7: Production of Shorn Wool, 1952.  
October 17: Cattle on Feed — Illinois, Iowa, Nebraska — October 1 1/  
November 10: Cattle Feeding Situation as of November 1.  
November 12: Lamb Feeding Situation as of November 1.  
\*December 22: Fall Pig Crop of 1952, and Spring Farrowings in 1953 indicated by Breeding Intentions.

Livestock Slaughter: Number of head, average live weight and total live weight of cattle, calves, hogs, sheep and lambs slaughtered in commercial plants by States, Meat Production by species and Lard Production for the United States: January 31, February 29, March 31, April 30, May 29, June 30, July 31, August 29, September 30, October 31, November 28, December 31.

(Released at Denver, Colorado)

April 11: Condition of Flint Hills and Osage Pastures as of April 1.

June 12: Shipments of Cattle into Flint Hills and Osage Pastures as of June.

Condition of Western Ranges, Cattle, and Sheep: January 10, February 11, March 11, April 10, May 12, June 11, July 10, August 11, September 10, October 9, November 10, December 10.

### Reports on Poultry and Eggs

Egg Production: Number of layers on hand during month, eggs per 100 layers, total eggs produced, issued with monthly Crop Production Report, also the number of layers on first of month by Geographic areas and U. S., also rate of egg production per 100 layers as of first of month.

Number of Chicks and Young Chickens of Current Year's Hatchings on hand as of first of month, issued with Crop Production Reports April 10, May 9, June 10 and July 10.

Potential Layers on farms as of first of month, issued with Crop Production Reports January 10, February 11, August 11, September 10, October 10, November 12, and December 10.

Composition of Farm Flocks October 1, issued with Crop Production Report October 10.

Number and Value of Chickens on Farms Jan. 1 issued with Livestock on Farms Jan. 1; February 14.

Number and Value of Turkeys on Farms Jan. 1 issued with Livestock on Farms Jan. 1; February 14.

Monthly Egg Production, 1950 and 1951: March 7.

1/ Reports resulting from special work undertaken under Research and Marketing Act Funds.

Young Chickens and Potential Layers on Farms in 1950 and 1951: March 27.

Chickens Raised on Farms, preliminary estimates, 1952: July 30.

Hatchery Production: Salable chicks hatched and eggs in incubators and chicks booked as of 1st of month: Jan. 15, Feb. 15, March 14, April 15, May 15, June 16, July 15, Aug. 15, Sept. 15, Oct. 15, Nov. 17, Dec. 15.

Hatchery Production: Revisions of monthly hatchery production in 1951, issued with Hatchery Production February 15.

Liquid and Dried Egg Production: Production, by classes, and utilization during preceding month: 25th of each month. 1/

Canned Poultry: 25th of each month. 1/

Farm Production and Income from Chickens and Eggs, 1951: April 17.

Turkey Production indicated by reported intentions as of January 1: January 24.

Farm Production and Income from Turkeys, 1951: April 9.

Turkey Production: Numbers raised indicated by number on hand as of August 1: August 22.

#### Reports on Milk and Dairy Products

Dairy Production: Milk production per cow 1st of month by States, milk production on farms for preceding month, U. S. and selected States, issued with monthly Crop Production Report. Separate release of Dairy Production about 12th of month.

Rations Fed to Milk Cows 1951, June 16.

Amount of Grain Fed per Milk Cow, as of first of month:

Averages for crop reporters' herds issued with Crop Production Reports: February 11, April 10, June 10, August 11, October 10, and December 10.

Milk Production on Farms and Statistics of Dairy Plant Products, 1951, February 14.

Farm Production, Disposition and Income from Milk, 1951: April 15.

Interstate Movement of Dairy Cattle in Northeastern States, May 15.

Number of Milk Cows on Farms, June: August 6.

Seasonal Average Condition of Dairy Pastures: With November Dairy Production

Dairy Marketings:

Weekly Creamery Butter Production: Tuesday of each week. (Released at Chicago, Ill., 805 New Post Office Bldg.)

Weekly American Cheese Production: Wednesday of each week. (Released at Chicago, Ill., 805 New Post Office Bldg.)

Weekly Wisconsin Warehouse Cheese Report: Thursday of each week. (Released at Chicago, Ill., 805 New Post Office Bldg.)

Monthly Creamery Butter and American Cheese Production: Detail, by Regions, 25th of each month. 1/ (Released at Chicago, Ill., 805 New Post Office Bldg.)

Monthly Ice Cream Production Report: Estimated production by States, 20th of each month. 1/ (Released at Chicago, Ill., 805 New Post Office Bldg.)

1/ Unless Saturdays, Sundays, or holidays conflict, in which case release is on the next business day.

Milk Prices Paid at Creameries and Cheese Plants, by States about 29th of each month. (Released at Chicago Ill., 805 New Post Office Bldg.) Simultaneously with Agricultural Price Reports.

Fluid Milk and Cream Report: Jan. 16, Feb. 18, Mar. 17, April 16, May 16, June 17, July 16, Aug. 18, Sept. 16, Oct. 16, Nov. 17, Dec. 15.

Evaporated, Condensed, and Dried Milk Report: 30th of each month. 1/

Evaporated and Condensed Milk, Wholesale Grocers' Stocks: January 22, April 22, July 22, October 21.

Production of Manufactured Dairy Products for 1951: November 1952.

#### Reports on Honey and Beeswax

January 25: Production and value of comb, extracted, and chunk honey and of beeswax in 1951, stocks of honey and beeswax on hand for sale, season average prices received for honey and beeswax, condition of colonies and average pounds of winter stores in hives.

March 3: Shipments of package bees and of queens monthly in 1951 and expected shipments in 1952 from six leading package bee States.

#### RADIO AND TELEVISION SERVICES

National Network Radio Programs: Economic information and statistical data based on Bureau research reports, situation analyses, and crop and livestock reports are included regularly in farm programs broadcast by four major networks.

(1) The National Farm and Home Hour, broadcast coast-to-coast over the full United States network of the National Broadcasting Company, Saturdays, 1 p.m. e.s.t.

(2) The American Farmer, broadcast over coast-to-coast network of the American Broadcasting Company, Saturdays, 12:30 p.m. e.s.t.

(3) The CBS Farm News, a network program of the Columbia Broadcasting System—heard Saturdays, 3:30 p.m. e.s.t., except during football season.

(4) Your Country Visitor, a network program of the Liberty Broadcasting System—heard Monday through Friday, 12:15 p.m. e.s.t.

Similar economic and statistical information also goes regularly to 550 farm directors on the staffs of local radio stations in all parts of the country, through the "RFD Letter," issued every two weeks by the Radio and Television Service of USDA in the Office of Information. It supplies local farm broadcasters with information on Department activities to help them develop their own programs.

Regional and Local Programs: Much of the general information on crop conditions and economic trends released by offices of the 41 State Agricultural Statisticians is used by local radio farm directors.

Farm Flashes: This is a service through which additional economic information and statistics are provided by the Radio and Television Service of the Department to listeners of approximately 700 local stations throughout the country. In most instances the Flashes are transmitted through the State extension services, where they are further localized. In addition to the above, materials are provided through the USDA Office of Information to three major press associations for press and radio use.

Television: The Bureau cooperates with the Office of Information of the Department in presenting economic information and statistics by television, as facilities permit.

National Network TV Program: CBS-TV Morning News, a network program of the Columbia Broadcasting System, originating from New York Fridays, 10-10:30 a.m. e.s.t.

1/ Unless Saturdays, Sundays, or holidays conflict, in which case release is on the next business day.

Agricultural Estimates

Agricultural Estimating and Reporting Services of the United States Department of Agriculture.  
Misc. Pub. 703. Dec. 1949. (printed)

Apple Production by Varieties, by Regions, 1950 and 1951. Aug. 14, 1951.

Apples—Production by Varieties, 1951 with Comparisons. Dec. 1951.

Certified Seed Potato Production in 1951, 28 Percent Smaller Than Record 1950 Crop, But 9 Percent Above Average. Jan. 16, 1952.

Chickens and Eggs—Monthly Egg Production, Young Chickens and Layers on Farms, and Rate of Lay, by States and Geographic Divisions, 1945-50. Revised Estimates. April 1952. (printed)

Chickens Raised on Farms in 1951, Preliminary Estimates. July 27, 1951.

Chicks Placed Weekly in Eleven Important Commercial Broiler Producing Areas in 1951. Jan. 29, 1952.

Citrus Fruits—Acreage, Production, Farm Disposition, Value and Utilization of Sales, Crop Seasons 1948-49 to 1950-51. Oct. 1951.

Commercial Truck Crops for Fresh Market—Usual Planting and Harvesting Dates and Principal Producing Areas by Seasonal Groups and States. May 1951.

Cranberries—1951 Crop. Aug. 21, 1951.

Deciduous Fruit Prices 1946-1950. July 1951.

Farm Production, Disposition, Cash Receipts and Gross Income, Chickens and Eggs, 1950-1951, Chickens on Farms, January 1, 1951-1952, by States. April 1952.

Farm Production, Disposition, Cash Receipts and Gross Income, Turkeys, 1950-1951, Turkeys on Farms, January 1, 1951-1952, by States. April 1952.

Farm Production, Disposition and Income from Chickens and Eggs, 1945-49, By State and Geographic Divisions. Revised Estimates. June 1952. (printed)

Farm Production, Disposition, and Income from Milk, 1940-49, Revised Estimates, by States. April 1952.

Farm Production, Disposition, and Income from Milk, 1950-51. April 1952.

Farm Production, Disposition, and Income from Turkeys, 1945-49, by States and Geographic Divisions. Revised Estimates. May 1952. (printed)

Farm Production, Farm Disposition, and Value of Principal Crops, 1950-1951, by States. May 1952.

Farm Stocks of Grains, Oilseeds, and Hay, Revised Estimates, 1944-51, by States. April 1952.

Fluctuations in Crops and Weather, 1866-1948, Stat. Bul. 101. June 1951. (printed)

Fruit Prices (Citrus and Peaches, 1945-1951). Oct. 1951.

Fruits and Nuts, Bearing Acreage, 1919-1946. CS-32. Jan. 1949. (printed)

Fruits (Noncitrus)—Production, Farm Disposition, Value, and Utilization of Sales, 1899-1944. CS-27. May 1948. (printed)

1/ Arranged according to divisions of work of the Bureau. Editions of these publications ordinarily are limited. Please order only those for which you have actual need.

2/ Printed reports are indicated as such; all others are processed.

CHARTS AND MAPS 1/

<u>Neg. No.</u>	<u>Title</u>
<u>Agricultural Finance</u>	
*34578-XX 38314	Rural demand deposits and retail sales. (1929-50.) (Line chart.) Average size of farm-mortgage loans made or recorded by principal lenders, United States, 1917-47. (Line chart.)
39891-XX	Taxes levied on farm real estate. (1910-49.) (Line chart.)
*39891A-XX	Farm real estate taxes. (Per acre; per \$100 full value) (1910-50.) (Line chart.)
43835	Average interest rate on outstanding farm mortgages and yield on domestic municipal bonds, domestic corporate bonds, and United States Treasury bonds, 1919-48. (Line chart.)
43836	Average interest rates on farm-mortgage debt, United States and major geographic divisions, January 1, 1910-48. (Line chart.)
45291	Demand deposits of rural banks, cash farm income, and rural retail sales, United States, 1929-47. (Line chart.)
46410-XX	Non-real-estate farm loans held by banks and Federally sponsored agencies. (1910-51.) (Surface chart.)
46418	Sources of credit to finance farm purchases, 1941-47. (Bar chart.)
46424-XX	Farm-mortgage debt held by major lenders. (1910-51.) (Surface chart.)
46524-X	Assets and indebtedness of U. S. agriculture, Jan. 1, 1940-50. (Line chart.)
46793	Index of average interest rates on outstanding farm-mortgage debt, by States, Jan. 1, 1915, 1923, 1940, and 1948. (4 shaded maps.)
46927	Farm-mortgage debt as percentage of value of mortgaged farms. (Jan. 1, 1940, 1945.) (2 shaded maps.)
46928	Percentage of all farms under mortgage. (Jan. 1, 1940, 1945.) (2 shaded maps.)
46929	Percentage change in outstanding farm-mortgage debt. (Jan. 1, 1915-23, 1940-48.) (2 shaded maps.)
46930	Farm-mortgage loans made or recorded, voluntary farm transfers, and farm foreclosures and assignments, United States, 1910-47. (Line chart.)
46931	Percentage of outstanding farm-mortgage loans held by principal lenders, United States, January 1, 1910-50. (Surface chart.)
46938	Farm-mortgage debt, value of farm real estate and net farm income, United States, 1910-48. (Line chart.)
46991	Percentage of farm-mortgage loans made or recorded by principal lenders, United States, 1910-47. (Surface chart.)
47049	Interest charges payable per acre on outstanding farm-mortgage debt, farm real estate taxes per acre, and prices paid by farmers for production, 1910-47. (Line chart.)
47050	Farm-mortgage interest charges, farm-mortgage debt, average interest rate on farm-mortgage debt, and cash farm income, 1910-47. (Line chart.)
*47142-X	Farm products needed to pay \$1,000 of debt. (1921-Feb. 1949.) (Pictorial chart.)
47195	Two plans for payment of principal and interest on new investment loans compared with net cash farm income available. (Line chart.)
47212-XX	Percentage change in farm-mortgage debt, Jan. 1, 1948-Jan. 1, 1949. (Shaded map.)
47213-XX	Percentage change in farm-mortgage debt, Jan. 1, 1946-Jan. 1, 1949. (Shaded map.)
47297-X	How farm machinery and equipment purchases were financed during 1947. (Pie charts.)
47344	Increase of bank deposits since 1940 and condition of banks on December 31, 1948, by type of counties. (Bar charts.)
47376-XX	The balance sheet of agriculture (assets and claims). (1940-51.) (Surface charts.)
47376A-XX	The farm balance sheet. (Assets, and owners' equities and debts.) (1940-51.) (Surface chart.)
47426-XX	Farmers' debts, 1949 as a percentage of 1921. (Shaded map.)
47427-XX	Farmers' non-real-estate debt, percentage increase, July 1, 1945 to July 1, 1949. (Shaded map.)

47116-XX	Wage rates and costs of poultry ration and baby chicks. (1929-49.) (Line chart.)
47138-X	Number of eggs produced annually per potential layer Jan. 1, by size of flock, 1929, 1939, and 1944. (Bar chart.)
47188-X	Cash receipts of farmers from eggs and poultry, United States, 1935-39, 1942-46, and 1948. (Bar chart.)
47242	Layers per farm flock on 1st of month, Iowa. (1945-47.) (Line chart.)
47243	Eggs laid per 100 layers on 1st of month, Iowa. (1945-47.) (Line chart.)
47261-X	Commercial broilers: Price and production as percentage of all chickens, 1934-49. (Line chart.)
47277-XX	Egg production per person. (1920-48.) (Line chart.)
47319-X	The consumer's turkey dollar, where it goes. (Pictorial bar chart.)
47320-X	Producer to consumer spreads for grade A, dressed young hens from the west between September 1, 1948 and January 31, 1949. (Line chart.)
47321-X	Producer to consumer spreads for grade A, dressed young toms from the west between September 1, 1948 and January 31, 1949. (Line chart.)
47324-X	Eggs: Monthly supplies and prices, July 1946 to June 1949. (Line chart.)
47324A-XX	Monthly supplies and prices of eggs. (1948-51.) (Line chart.)
47394-X	Dried egg purchases for price support, Jan.-Aug. 1949 by States, as a percentage of U. S. total. (Shaded map.)
47416-XX	Farm egg prices and consumer income. (1935-50.) (Line chart.)
47443-XX	Eggs in storage: Commercial stocks and USDA purchases as a percentage of Jan.-July farm production. (1925-50.) (Surface chart.)
47498-XX	U. S. egg producers boost off-season rate of lay. (Eggs per layer, by months, 1930, 1940, 1949.) (Line chart.)
47547-XX	Value of monthly egg production per layer. (Oct. 1948-Sept. 1949.) (Bar chart.)
47557	Rates of lay: Eggs per 100 layers in farm flocks, by months. (1935-49.) (Line charts.)
47558-XX	Egg production per layer. (1925-49.) (Line chart.)
47559-XX	Seasonal variation in farm egg prices. (1925-49.) (Line chart.)
47604-XX	Farm value of poultry products, 1949. (Pie chart.)
47605-XX	Retail egg prices, 1949, by principal cities. (Location map.)
47606-XX	Farm egg prices, 1949, by price-reporting districts. (Shaded map.)
47608-XX	U. S. production of eggs, chicken meat, red meat, and milk. (5-yr. moving av., 1910-49.) (Line chart.)
47609-XX	Farm prices for eggs, chickens, meat animals, and dairy products. (5-yr. moving av., 1910-49.) (Line chart.)
47611-XX	Seasonal variations affecting marketing for eggs, 1925-29 and 1945-49. (Line chart.)
47613-XX	Chicken meat production. (1925-49.) (Line chart.)
47614	Hypothetical supply and demand schedules at the farm level for eggs and chickens, United States, 1925-29, 1925-29 adjusted, and 1945-49. (Correlation chart.)
47616-XX	Eggs, meats, milk: Consumption per person. (5-yr. moving av., 1910-49.) (Line chart.)
47619-XX	Marketing charges by egg handlers. (By weeks, Nov. 1947-Oct. 1948.) (Line chart.)
47620-XX	Marketing charges for eggs from Wisconsin. (By weeks, Nov. 1947-Oct. 1948.) (Surface chart.)
47621-X	How one shipment of eggs went from farmers to consumers. (Flow chart.)
47654-XX	Egg prices by size of flock, North Central States. (April and August 1948.) (Line chart.)

## HOW TO ORDER MATERIALS

Copies of one or more of the publications listed in the foregoing pages may be obtained from:

Division of Economic Information  
Bureau of Agricultural Economics  
U. S. Department of Agriculture  
Washington 25, D. C.

Except where a charge is specified, there is no charge for these publications. No charge is made for postage.

Editions of these publications are usually limited. Please check the list carefully. Order only those for which you will have actual use.

### Mailing Lists

Mailing lists are maintained for the periodicals and for many of the scheduled reports issued by the Bureau. Names are added upon request to the above address. For paid subscriptions see the instructions listed under each periodical.

All changes of address or requests to be dropped from mailing lists should specify the exact publications involved. If possible, such requests should be accompanied by the envelopes or wrappers in which the materials have been received.

Mailing lists are revised each year. At that time all subscribers currently listed receive a notice of the revision. It is necessary that these notices be filled in and returned to the Bureau; otherwise, the names of those who fail to indicate their continued need for the materials are dropped automatically from the list.

Mailing lists are not maintained for all reports issued on any certain subject, such as "farm wages," "dairying," "parity," etc. See the checklist of publications of the Bureau beginning on page 23 and the monthly checklist of BAE publications and charts.

### Charts and Maps

Copies of the charts and maps listed on pages 44 - 82 are available in the following forms:

Photographic prints, dull or glossy, 8x10 inches ..... \$ .55 each  
This price applies to any chart or map.

Wall charts (bromide enlargements) 30x40 inches ..... 9.55 each  
This price applies to any chart or map.

Wall charts (ozalid prints) 30x40 inches ..... 1.06 each  
This price applies only to those charts and maps marked with an asterisk (\*).

When ordering, list negative number, title, and size. If ordering 8"x10" prints, specify dull or glossy finish. Make all remittances for charts and maps payable to "Treasurer of the United States." Send orders and remittances to:

Division of Economic Information  
Bureau of Agricultural Economics  
U. S. Department of Agriculture  
Washington 25, D. C.

### Film Strips and Slides

See "Agricultural Outlook Charts" on page 12.
